

CLAIMS

1. A cleaning sheet adapted to be attached to the head of a cleaning tool and having a wiping portion adapted to be disposed on the bottom of the head, the cleaning sheet having a projecting part in the wiping portion, the projecting part being adapted to stick out of the edge of the head by a projecting length M when the cleaning sheet is attached to the head, and the projecting part having a repulsive force of 0.1 to 100 N/cm when deformed by a length $M/3$ in the direction opposite the projecting direction thereof.
5
2. The cleaning sheet according to claim 1, comprising a base sheet and a wiping sheet disposed on the surface of the base sheet and having the projecting part as a fringe of the wiping sheet.
